The Entac extension cords with a cable reel are indispensable both at work and home. With their help you can provide electricity for all of your electric devices even if the power source is located further away. The 4 earthed sockets on the cable reel provide power for several machines at the same time. In the IP20 version we offer 25 and 50-meter-long extension cords, while the IP44 version is available in 25 and 35-meter lengths, with a 3G1.5 cable type. The IP44 extension cords are also suitable for outdoor use due to their water and dust-proof properties.

The Entac extension cords category includes numerous other products. Learn more about these on the following [link](#).
